SOVIET MATHEMATICS — DOKLADY

INDEX OF AUTHORS

Volume 40 January-June 1990 Russian Toms 307–309

Abdullaev, S. K. *Multidimensional singular integral equations in Hölder spaces with a weight, degenerating on a noncompact set* 417

Aliev, F. A., Bordyug, B. A., and Larin, V. B. *An algorithm for the factorization of polynomial matrices* 137

Aliev, Z. S. See Makhmudov, A. P.

Almamedov, M. S. *On the spectral measure of a class of selfadjoint multiparameter operators* 563

Anikonov, Yu. E. and Pestov, L. N. *Integral geometry and the structure of Riemannian spaces* 90

Anulova, S. V. *Functional limit theorems for semimartingales in a convex domain* 132

Asanov, A. See Imanaliev, M. I.

Avdonin, S. A. and Ivanov, S. A. *A generating matrix-valued function in problems of controlling the vibrations of connected strings* 179

Avkhadiev, F. G. *Estimates in the Zygmund class and their application to boundary value problems* 217

Baĭdosov, V. A. *Differential inclusions with fuzzy right-hand side* 567

Bakaev, N. Yu. *Estimates of stability of a general discretization method* 447

Bessonov, V. A. and Ivanilov, Yu P. *Production rate functions with bounded effective set* 589

Bezhaev, A. Yu. *Approximation of linear functionals and multidimensional spline interpolation* 221

Bobylev, N. A. and Krasnosel'skiĭ, M. A. *Normal deformations of variational problems* 141

Boĭmatov, K. Kh. *On the denseness of compactly supported functions in weighted spaces* 225

———. *On the eigenvalues of elliptic differential operators in limit-cylindrical domains* 269

Bordyug, B. A. See Aliev, F. A.

Borovik, A. V. *Finite subgroups of simple algebraic groups* 570

Borovikov, V. P. *On the asymptotic theory of divisible statistics based on frequencies* 452

Borovskikh, Yu. V. See Korolyuk, V. S.

Brykalov, S. A. *Nonlinear boundary value problems and existence of steady states for heating control systems* 1

Bulabaev, A. T. and Shuster, L. A. *On the theory of Sturm-Liouville difference equations* 525

Burskiĭ, V. P. *Boundary properties of L_2-Solutions of linear differential equations, and equation-domain duality* 592

Butsan, G. P. *A mixed product of dependent stochastic operator systems* 229

Buyalo, S. V. *Three-dimensional manifolds of nonpositive curvature containing Euclidean planes* 184
Bykov, A. A. *A stable method of solving stiff boundary value problems for second order ordinary differential equations with a slowly varying matrix* 273
Chanturiya, Z. A. *On conditions for continuity of functions of generalized bounded variation* 263
Cherednik, I. V. *Generalized braid groups and local r-matrix systems* 43
Chernov, A. Yu. *On a class of local algorithms* 380
Daletskiĭ, A. Yu. *The factorization problem in a symplectic groupoid, and Hamiltonian systems on spaces with nonlinear Poisson brackets* 389
Daletskiĭ, Yu. L. See Gel′fand, I. M.
Danilyuk, I. I. *The multidimensional Dirichlet problem for linear and quasilinear differential equations of elliptic type* 601
Dantsin, E. Ya. and Kreĭnovich, V. Ya. *Probabilistic inference in prediction systems* 8
Dem′yanov, V. F. *Second order approximation for a nonsmooth function* 534
Denisov, A. M. *Inverse problems for nonlinear ordinary differential equations* 187
Doktorskiĭ, R. Ya. *Eigenvalues of some classes of integral operators* 13
Dudnikov, P. I. and Samborskiĭ, S. N. *Spectra of endomorphisms of semimodules over semirings with an idempotent operation* 363
Dzhangibekov, G. *On the Noether property and the index for some two-dimensional singular integral operators* 394
Egorushkin, A. A. and Zyabrev, N. B. *On the solution of multifactor nonlinear problems of optimal planning* 189
Fedorov, S. I. See Pavlov, B. S.
Fedoryuk, M. V. *Asymptotics of the spectrum and solutions of the Lamé wave equation* 413
Fel′dman, G. M. *The Cauchy distribution on Abelian groups and its characterization* 486
Gabov, S. A. *On a property of systems of functions complete in* $W_2^1(\Omega)$ 235
Galaktionov, V. A. *A sharp estimate of the support of an unbounded solution of a quasilinear degenerate parabolic equation* 493
Gasymov, M. G. and Guseĭnov, G. Sh. *On inverse problems of spectral analysis for infinite Jacobi matrices in the limit-circle case* 627
Gavrilenko, Yu. V. *Principal solutions and groups of automorphisms of systems of equations in terms* 529
Gel′fand, I. M., Daletskiĭ, Yu. L., and Tsygan, B. L. *On a variant of noncommutative differential geometry* 422
Gel′fand, I. M. and Rybnikov, G. L. *Algebraic and topological invariants of oriented matroids* 148
Gel′fand, I. M., Zelevinskiĭ, A. V., and Kapranov, M. M. *A-discriminants and Cayley-Koszul complexes* 239
———. *Newton polyhedra of principal A-determinants* 278
Gorbachuk, V. M. *Behavior at infinity of solutions of differential-operator equations* 282
Grinchuk, M. I. *On the complexity of realization of symmetric Boolean functions by contact networks* 574
Grudskiĭ, I. M. *The Christoffel-Schwarz formula for polyhedral surfaces* 5
Grudskiĭ, S. M. *Convolution equations on a finite interval with a small parameter in the growing part of the symbol* 596
Gurvich, V. A. *Some properties of effectivity functions* 244

———. See Obraztsov, I. F.
Guseĭnov, G. Sh. See Gasymov, M. G.
Gvishiani, A. D. See Obraztsov, I. F.
Imanaliev, M. I. and Asanov, A. *On solutions of systems of nonlinear Volterra integral equations of the first kind* 610
Ivanilov, Yu P. See Bessonov, V. A.
Ivanov, S. A. See Avdonin, S. A.
Kabanikhin, S. I. *On linear regularization of multidimensional inverse problems for hyperbolic equations* 579
Kapranov, M. M. See Gel'fand, I. M.
Kapustin, N. Yu. *On the theory of boundary value problems with boundary functions in L_2* 251
Karpeshina, Yu. E. *Perturbation theory for the Schrödinger operator with a periodic nonsmooth potential* 614
Kashchenko, S. A. *On shortwave bifurcations in systems with little diffusion* .. 54
Kazaryan, G. G. and Markaryan, V. N. *Lower bounds on the functional dimension of the solution space of hypoelliptic equations* 290
Khakhlyutin, V. P. *Determination of a function from its integrals along a family of rays associated with a one-dimensional manifold in $\mathbf{R}^n$* 490
Khlobystov, V. V. See Makarov, V. L.
Khusnutdinova, N. V. *On the structure of the domain of degeneracy of a system of quasilinear parabolic equations* 39
Kislyakov, S. V. *Proper uniform algebras are uncomplemented* 584
Klibanov, M. V. *A uniqueness theorem for an inverse diffraction problem* 497
Klimkin, V. M. *Uniform boundedness of a family of weakly regular nonadditive set functions* 631
Kokilashvili, V. M. *Potentials on thin sets* 400
Koldunov, A. V. *Generalized Dedekind completions of ordered sets, groups, and vector spaces* 427
Komrakov, B. P. *Reductive subalgebras of semisimple real Lie algebras* 329
Korobov, V. I. and Sklyar, G. M. *The Markov moment problem on the smallest possible interval* 334
Korolyuk, V. S. and Borovskikh, Yu. V. *UH-statistics* 432
Korovina, M. V. *Cauchy problems for overdetermined systems of linear differential equations* 469
Kostin, V. A. *On analytic semigroups and cosine functions* 153
Kozeratskaya, L. N., Lebedeva, T. T., and Sergienko, T. I. *Integer programming problems with a vector criterion. Parametric analysis and investigation of stability* 98
Kozlov, V. A. *A strong zero theorem for an elliptic boundary value problem in an angle* 633
Krasichkov-Ternovskiĭ, I. F. and Shishkin, A. B. *Spectral synthesis for a multiple differentiation operator* 16
Krasnosel'skiĭ, M. A. See Bobylev, N. A.
Kravtsov, M. K. *Polyhedral aspects of transportation problems* 500
Kreĭnovich, V. Ya. See Dantsin, E. Ya.
Kukushkin, N. S. *On a class of games having stable outcomes* 157
Kusraev, A. G. and Malyugin, S. A. *On the projective limit of vector-valued measures* 59
Kuzin, I. A. *The existence of a ground state for some nonlinear scalar fields* .. 293
Larin, V. B. See Aliev, F. A.

Larionov, E. A. *Asymptotics of eigenvalues under weak perturbation of normal operators* 161
Lavrent'ev, M. M. *Evolution equations and the Goursat problem for the telegraph equation with an operator coefficient* 298
Lavrik, A. A. *Uniform approximations and zeros in short intervals of the derivatives of the Hardy function* 20
Lavrik, A. F. *Closed triplicity of functional equations for zeta-functions* 403
Lebedeva, T. T. See Kozeratskaya, L. N.
Ledyaev, Yu. S. *The maximum principle for optimal strategies in differential games* 301
Lekishvili, M. M. *Exponential integrability of the trigonometric conjugation operator* 338
Lerner, M. E. *On two new qualitative properties of the Riemann function* 166
Levin, M. B. *On the choice of parameters in generators of pseudorandom numbers* 101
Loginov, B. V. See Trenogin, V. A
Logofet, D. O. *On indecomposability and imprimitivity of nonnegative block-structured matrices* 306
Makarov, N. G *On the radial behavior of Bloch functions* 505
Makarov, V. L. and Khlobystov, V. V. *An interpolation formula of Newton type for nonlinear functionals* 106
Makhmudov, A. P. and Aliev, Z. S. *On global bifurcation of solutions of some nonlinearizable eigenvalue problems* 367
———. *Some global results for linearizable and nonlinearizable Sturm-Liouville problems of fourth order* 472
Malinin, D. A. *On integral representations of p-groups over local fields* 619
Malyugin, S. A. See Kusraev, A. G.
Markaryan, V. N. See Kazaryan, G. G.
Matveev, A. F. *On the construction of approximate solutions of singular integral equations of the second kind* 193
Meleshko, V. I. *On regularization of nonlinear nonregular mappings* 311
Mikhailov, G. A. *Minimax solutions of equations determining the variance of weighted estimates in the Monte Carlo method* 198
Mikhailov, L. G. *A quasilinear generalized Cauchy-Riemann system with several independent variables* 202
Miloslavskii, A. I. *The spectrum of small oscillations of a viscoelastic hereditary medium* 538
Monastyrnyi, A. P. and Yanchevskii, V. I. *On Whitehead groups and the Kneser-Tits conjecture for spinor groups* 23
Nadirashvili, N. S. *On the dynamics of nonlinear parabolic equations* 636
Nasibov, F. G. *On approximation by entire functions* 542
Nasibov, Sh. M. *On optimal constants in some Sobolev inequalities and their application to a nonlinear Schrödinger equation* 110
Nikolaev, I. G. *On the axioms of Riemannian geometry* 172
Nikol'skiĭ, È. V. *Generalized functionally invariant solutions of a multidimensional second-order scalar equation of general form* 477
———. *The method of generalized functionally invariant solutions for equations of mathematical physics* 436
Nikol'skiĭ, M. S. *Approximation of continuous multivalued mappings with convex range* 406

Obraztsov, I. F., Gvishiani, A. D., and Gurvich, V. A. *Elementary vectors in separable convex programming* 207
Panina, G. Yu. *Integral representations of convex bodies* 116
Panyushev, D. I. *Complexity and rank of homogeneous spaces, and the coisotropy representation* 63
Paulauskas, V. I. and Yuknyavichene [Juknevičienė], D. B. *On the rate of convergence in the central limit theorem in the space $D[0, 1]$* 119
Pavlov, B. S. and Fedorov, S. I. *Harmonic analysis on a Riemann surface* 316
Pchelin, B. K. *On the general theory of polyanalytic functions* 587
Penkin, O. M. See Pokornyĭ, Yu. V.
Peretyat'kin, M. G. *Similarity of the properties of recursively enumerable and finitely axiomatizable theories* 372
Pestov, L. N. See Anikonov, Yu. E.
Pestov, V. G. *On a valued field introduced by A. Robinson and structures connected with it* 482
Pilidi, V. S. *On uniform invertibility of regular approximations of one-dimensional singular integral operators with piecewise continuous coefficients* 67
Plotkin, E. B. See Vavilov, N. A.
Pokornyĭ, Yu. V. and Penkin, O. M. *Sturm theorems for equations on graphs* 640
Radkevich, E. V. *On the solvability of the contact Stefan problem* 28
Rasulov, K. M. *On the solution of boundary value problems of Dirichlet-problem type for polyanalytic functions* 643
Romanov, A. V. *Asymptotic finite-dimensionality of semilinear parabolic equations* 122
Rubin, B. S. *On an integral equation of the first kind with a weak singularity in the n-dimensional ball* 648
———. *Radial-spherical convolution operators in L_p-spaces with a weight* 509
Rukavishnikov, V. A. *On differentiability properties of an R_ν-generalized solution of the Dirichlet problem* 653
Rybnikov, G. L. See Gel'fand, I. M.
Sabitov, K. B. *Maximum modulus principles for some classes of second order elliptic and hyperbolic systems* 656
Sadyrkhanov, R. S. *Local and global implicit function theorems for equations with singularities* 410
Safiev, E. K. *Coincidence of classical and generalized solutions of a mixed problem for a parabolic equation* 255
Salikhov, V. Kh. *On algebraic independence of the values of hypergeometric E-functions* 71
Samborskiĭ, S. N. See Dudnikov, P. I.
Samborskiĭ, S. N. and Tarashchan, A. A. *On semirings arising in multicriterion optimization problems and problems of analysis of computational media* .. 441
Sergienko, T. I. See Kozeratskaya, L. N.
Shadrin, A. Yu. *On the rate of convergence of interpolation splines defined on nonuniform meshes* 266
Shakhbazyan, K. V. *On the representation of processes in graphs* 326
Shatalov, V. E. See Sternin, B. Yu.
Shavgulidze, E. T. See Smolyanov, O. G.
Shevchuk, I. A. *On coapproximation of monotone functions* 349
Shishkin, A. B. See Krasichkov-Ternovskiĭ, I. F.
Shlyk, V. A. *C_p-capacity and normal domains* 86

Shokin, Yu. I. and Urusov, A. I. *Differential representation of difference schemes with coefficients depending on time* 213
Shuster, L. A. See Bulabaev, A. T.
Shyevski, M. *The fifth invariant of quadratic forms* 355
Sidorov, N. A. See Trenogin, V. A
Sinitsyn, V. I. *A new approximation method for finding the one-dimensional distribution of the vector process determined by a stochastic differential equation* 547
Sitnikov, M. L. *Models of polynomial representations of the Lie superalgebra* $\mathfrak{gl}(m, n)$ 127
Sklyar, G. M. See Korobov, V. I.
Skubachevskiĭ, A. L. *On some problems for multidimensional diffusion processes* 75
Smolyanov, O. G. and Shavgulidze, E. T. *Representation of solutions of linear evolution superdifferential equations of second order by functional integrals* 552
Soĭbel'man, Ya. S. *Irreducible representations of the function algebra on the quantum group* $\mathrm{SU}(n)$, *and Schubert cells* 34
Sorokin, A. S. *The Goluzin-Kufarev variational method and the Keldysh-Sedov formula* 321
Spitkovskiĭ, I. M. and Tashbaev, A. M. *Factorization of piecewise constant matrix-valued functions with 3 points of discontinuity in* $L_{p,\rho}$ *classes, and some of its applications* 80
Stepanov, A. V. See Vavilov, N. A.
Sternin, B. Yu. and Shatalov, V. E. *On a new class of integral representations in complex analysis* 513
Strelkov, N. A. *Optimal coordinate functions in projection-difference methods, widths, and lattice packings* 558
Sukacheva, T. G. See Sviridyuk, G. A.
Sviridyuk, G. A. and Sukacheva, T. G. *Fast-slow dynamics of viscoelastic media* 376
E Syandun [Ye Xiangdong] *Minimal sets and coexistence of almost periodic points of transformations of a closed interval* 607
Tarashchan, A. A. See Samborskiĭ, S. N.
Tarkhanov, N. N. *A criterion for solvability of the ill-posed Cauchy problem for elliptic systems* 341
Tashbaev, A. M. See Spitkovskiĭ, I. M.
Tkebuchava, G. E. *On the divergence of multiple Fourier series with respect to bases* 346
Trenogin, V. A, Sidorov, N. A., and Loginov, B. V. *Branching equations: potentiality, bifurcation, symmetry* 517
Trushin, V. B. *On the solution of certain nonlinear equations and variational inequalities* 521
Tsikh, A. K. *Integrals of rational functions over the space* $\mathbf{R}^n$ 258
Tsygan, B. L. See Gel'fand, I. M.
Urusov, A. I. See Shokin, Yu. I.
Vagabov, A. I. *On the summability of n-fold expansions in principal functions of pencils of ordinary differential operators* 457
Varchenko, A. N. *The determinant of the matrix of multidimensional hypergeometric integrals* 359
Vavilov, N. A., Plotkin, E. B., and Stepanov, A. V. *Computations in Chevalley groups over commutative rings* 145

Veretennikov, A. Yu. *On hypoellipticity conditions and estimates of the mixing rate for stochastic differential equations* 94
Vladimirov, A. A. *Averaging properties of multidimensional hysteresis operators* 623
Yakovenko, S. Yu. *On the concept of an infinite extremal in stationary problems of dynamic optimization* 384
Yanchevskiĭ, V. I. See Monastyrnyĭ, A. P.
Yuditskiĭ, P. M. *On the upper envelope of a family of rational functions with fixed poles, a fixed zero, and not exceeding one on the unit circle* 175
Yuknyavichene [Juknevičienė], D. B. See Paulauskas, V. I.
Zakharov, V. A. *Automata models of programs* 462
Zasorin, Yu. V. *On the Helmholtz equation with an anisotropic source* 286
Zelevinskiĭ, A. V. See Gel'fand, I. M.
Zoriĭ, N. V. *The problem of a minimum of the Green energy for spatial condensers* 49
Zubov, V. I. *Equations of energy transformation* 466
Zyabrev, N. B. See Egorushkin, A. A.
